

Developers Group

Username	Password
robin	Robin!23
vincent	Vincent!23
binh	Binh!23

Repo URL

/home/git/corp-sec.git

Web URL

http://dev.dreamsmart.com.sg/corp-sec

Database Access

http://dreamsmart.com.sg/phpmyadmin

Panel Access

username: user

password: dreamsmart!23

Database Credentials

username: root

password: dreamsmart!23

Clone The Project (in Terminal)

git clone <username>@dreamsmart.com.sg:<repo_url>

When prompt for password, use the one in the table above according to your username

Interface to check repositories

http://viewgit.dreamsmart.com.sg

Use the [username](#) and [password](#) from the table above

How to Start

- Clone the repo to your local machine
- Export SQL dump from the database
- Create the database and import the SQL dump earlier
- Edit database config (app/Config/database.php)
- Edit the domain URL in the app JavaScript file (app/webroot/js/application.js)

Git Best Practices

- Commit often. Commit whenever a small bug fix is done or a feature is completed
- Write detailed commit message so that other developers will know what exactly you have pushed
